PROFESSIONAL SUMMARY

Full-Stack Software Engineer | IT Head | System Architect

Kathmandu, Nepal | aayush2658@gmail.com | [LinkedIn](https://www.linkedin.com/in/aayush-b-128719163/) | [GitHub: github.com/aayushbhn](https://github.com/aayushbhn)

Strategic Full-Stack Developer and IT Lead with over 3.5 years of experience architecting and deploying 18+ production-grade projects. Expertise in building high-performance backends using Python (Django/Flask), PHP (Laravel), and Node.js. Proven track record of taking full ownership of complex systems, including proprietary AI recommendation engines, specialized astrological APIs, and large-scale fintech and e-commerce infrastructure. Specialized in modernizing legacy architectures and leading in-house tech teams to deliver scalable, AI-integrated solutions for global markets.

TECHNICAL SKILLS & COMPETENCIES

- **Languages:** TypeScript, Python, PHP, JavaScript, SQL, HTML5, CSS3.
- **Backend Frameworks:** Python (Django, Flask), PHP (Laravel 10, Livewire), Node.js (Express), RESTful & GraphQL APIs.
- **Frontend Frameworks:** React, Next.js (App Router), Tailwind CSS, Shopify Liquid, EJS, Blade Components.
- **AI & Data:** OpenAI API Integration, Recommendation Algorithms (Collaborative Filtering, Content-Based, Learning-to-Rank), Vector Embeddings.
- **Databases & DevOps:** PostgreSQL, MySQL, Redis, Docker, AWS (ECS), Vercel, CI/CD (Husky, Linting).
- **Specialized Platforms:** Shopify App Framework, Fintech (Razorpay), Real-time Systems (Socket.io), WhatsApp Business API Platform.

PROFESSIONAL EXPERIENCE

NEPA RUDRAKSHA | Kathmandu, Nepal

IT Head / Lead Developer / Manager | **Sept 2022 – Present**

Directed the company's digital transformation and in-house technology for a global leader in spiritual products.

- **AI & Automation:** Managed the successful handover and expansion of the flagship **Veda AI** backend, enhancing personalized kundali-based recommendation flows and real-time chat analytics using Laravel and OpenAI.
- **Product Development:** Built the **Sadhana Circle** custom Shopify Loyalty & Rewards app from the ground up using React, Prisma ORM, and Shopify Admin extensions.
- **High-Precision Systems:** Developed the **Panchanga API** (Python) for high-precision Hindu calendar calculations and a proprietary **Recommendation System** for personalized product matching.
- **Fintech & Communication:** Engineered the **WhatsApp Business API platform** for automated global customer engagement and integrated **Razorpay** for secure international transactions.
- **Infrastructure:** Architected and deployed key internal platforms: the Event System (QR-based tracking), Multipass-Login for cross-platform authentication, Gallery Manager, and Survey Form systems.
- **Leadership:** Oversaw full system documentation, managed technical hiring, and directed the migration of legacy product data into a modern Laravel-based inventory system.

FREELANCE & INDEPENDENT PROJECTS

- **Bharosa Real Estate (Full-Stack Owner):** Designed and implemented a comprehensive marketplace using a 3-tier architecture: Next.js, Express, and PostgreSQL. Developed a custom hybrid AI Recommendation Engine (Collaborative + Content-Based) to optimize property-to-user matching.

SELECTED PROJECT PORTFOLIO

- **Veda AI:** AI Chat & Astrology Engine | *Laravel, OpenAI, MySQL, Pusher*
- **Panchanga API:** High-precision Astrological Calculations | *Python, Vercel*
- **Recommendation System:** AI-driven matching engine | *Python (Flask/Django), ML Algorithms*
- **Sadhana Circle:** Shopify SaaS Loyalty App | *React, Shopify API, Prisma, SQLite*
- **WhatsApp Business API:** Automated Communication Platform | *Node.js, Express, Webhooks*
- **Event System:** QR-based Management Utility | *TypeScript, React, Vite, QR Logic*

EDUCATION

Sagarmatha Engineering College | BE in Computer Engineering (2019 – 2024)

Coursework completed; transitioned into technical leadership/architecture roles to manage global tech operations.

KMC College, Bagbazar | +2 Science

ADDITIONAL SKILLS

- **Code Quality:** Expert in Git workflow (Conventional Commits), TDD (Pest/PyTest), and automated linting (Pint/ESLint).
- **Management:** Requirement gathering, system documentation, and technical team leadership.
- **Languages:** Native Nepali, Professional English, Fluent Hindi.

Strategic **Full-Stack Developer** and **IT Lead** with 3.5+ years of experience architecting and deploying **18+ production-grade projects**. Expert in high-performance backends using **Python (Django/Flask)**, **PHP (Laravel)**, and **Node.js**. Proven track record of taking full ownership of complex systems; ranging from proprietary AI recommendation engines and specialized astrological APIs to fintech and e-commerce infrastructure. Specialized in modernizing legacy architectures and leading in-house tech teams to deliver scalable, AI-integrated solutions for global markets.

TECHNICAL CORE COMPETENCIES

- **Languages:** TypeScript, Python, PHP, JavaScript, SQL, HTML5, CSS3.
 - **Backend:** Python (**Django, Flask**), PHP (**Laravel 10**, Livewire), Node.js (**Express**), RESTful & GraphQL APIs.
 - **Frontend:** React, Next.js (App Router), Tailwind CSS, Shopify Liquid, EJS, Blade Components.
 - **AI & Data:** OpenAI API Integration, Recommendation Algorithms (Collaborative Filtering, Content-Based, Learning-to-Rank), Vector Embeddings.
 - **Databases & DevOps:** PostgreSQL, MySQL, Redis, Docker, AWS (ECS), Vercel, CI/CD (Husky, Linting).
 - **Specialized:** Shopify App Framework, Fintech (**Razorpay**), Real-time Systems (Socket.io), WhatsApp Business API Platform.
